BRIGHTV

Viewership Analysis

Objective: Driving Subscription Growth Through Data Insights

Presented By:
YOLA NKALA

Executive Summary

- BrightTV aims to grow its subscription base
- Key audience: Young Adults (20–39)
- High engagement content:
- Entertainment
- Music
- Sports
- Engagement varies by time of day & content type
- Opportunity: Optimize low-consumption periods
- Strategy: Personalization + targeted content + user acquisition initiatives

AGENDA

- Key Insights & Performance Overview
- Customer Profile & Consumption Drivers
- Content & Time-Based Analysis
- Strategic Recommendations

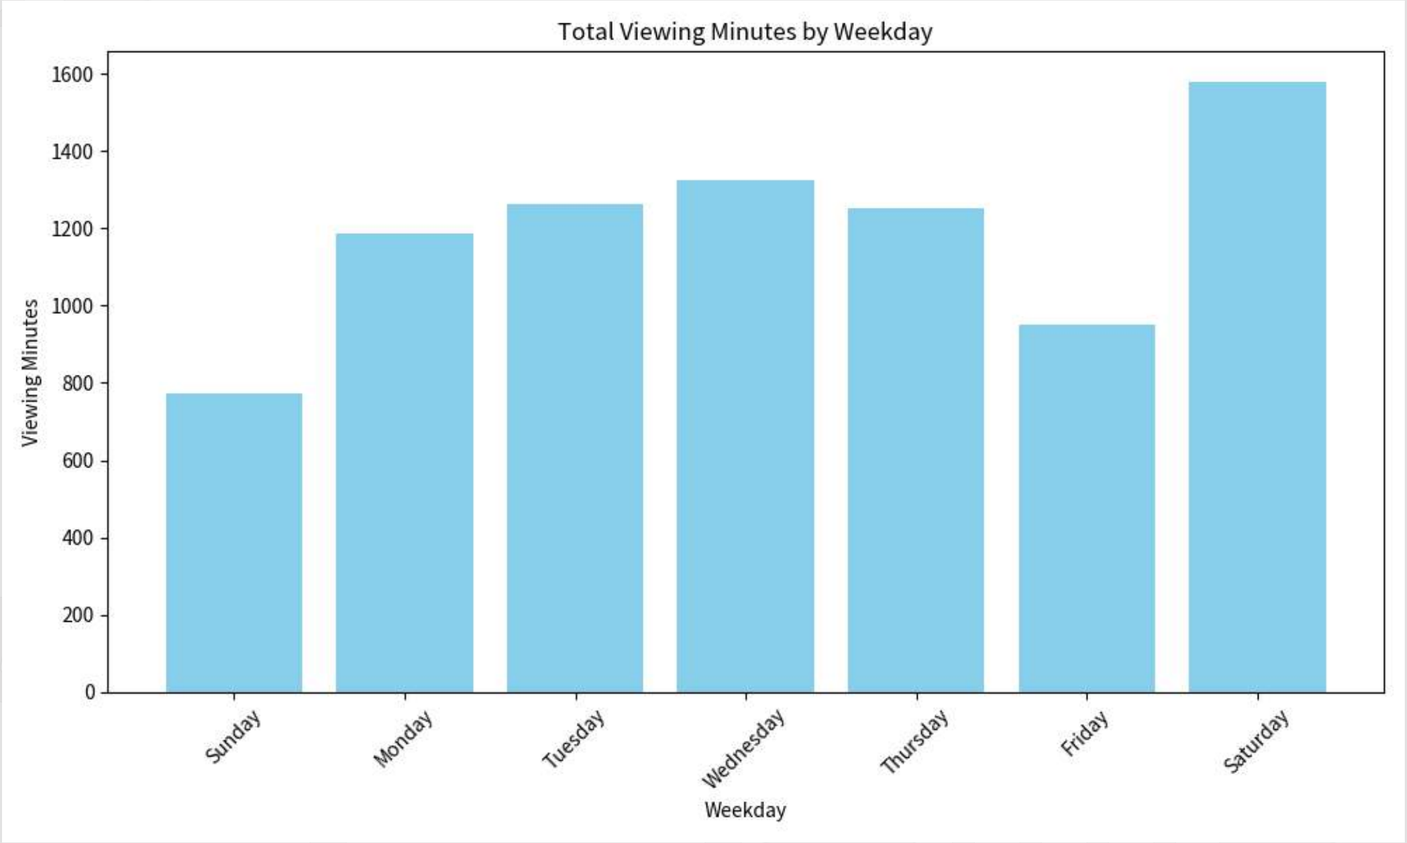
Data Overview

- Dataset covers user demographics (age basket, gender, province, race) + session-level transactions
- Times converted to SA time (UTC+2) as instructed
- Consumption measured per session (1 record = 1 session)
- Key aggregates:
- Total sessions/customers: 1,000
- Total viewing minutes: 8,331
- Average session duration: derived from pivots (varies by time/content)

Usage Trends – By Weekday

Total Viewing Minutes by Weekday (highest to lowest

Weekday	Viewing Minutes
Saturday	1,578.57
Wednesday	1,325.76
Tuesday	1,263.85
Thursday	1,250.61
Monday	1,187.70
Friday	952.27
Sunday	772.39

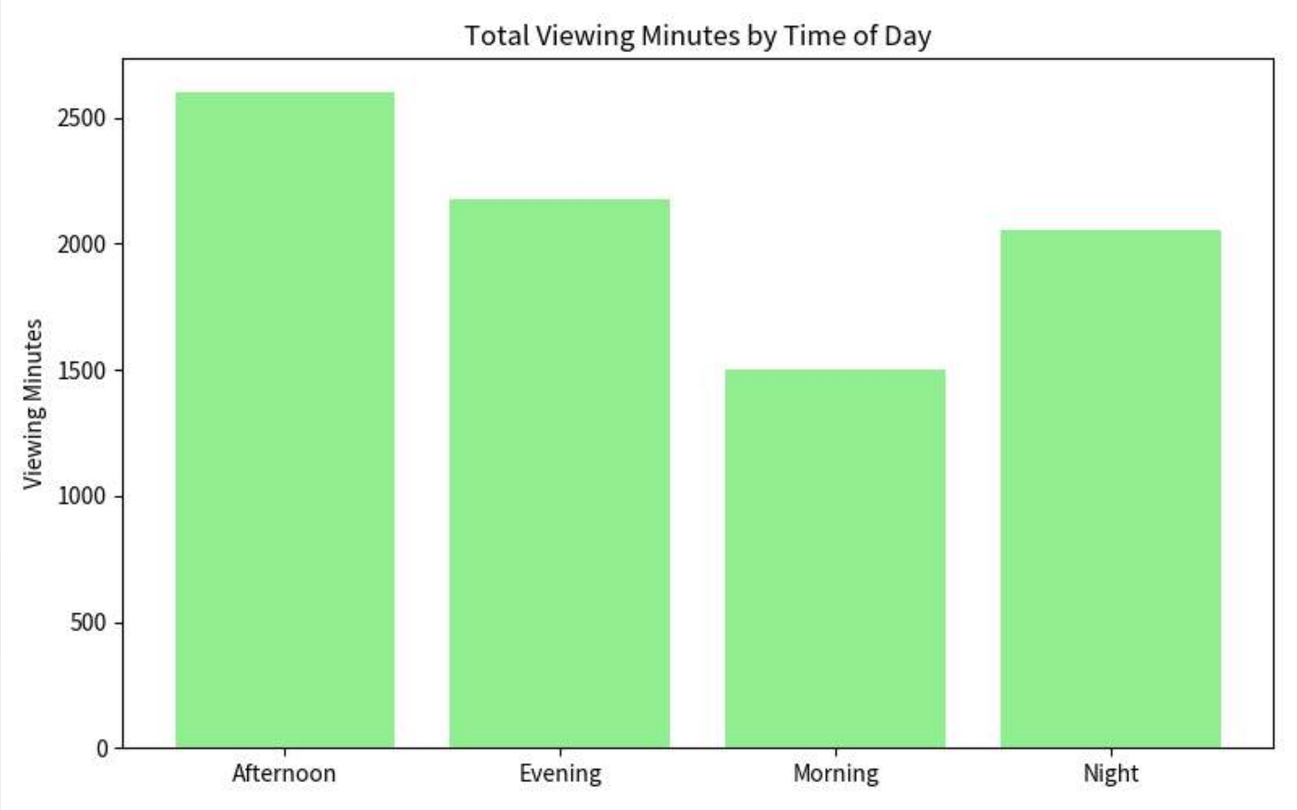


Key Insight: Strong weekend peak on Saturday; Sunday and Friday are clear low-consumption days (lowest total minutes).

Usage Trends – By Time of Day

Total Viewing Minutes by Time Group

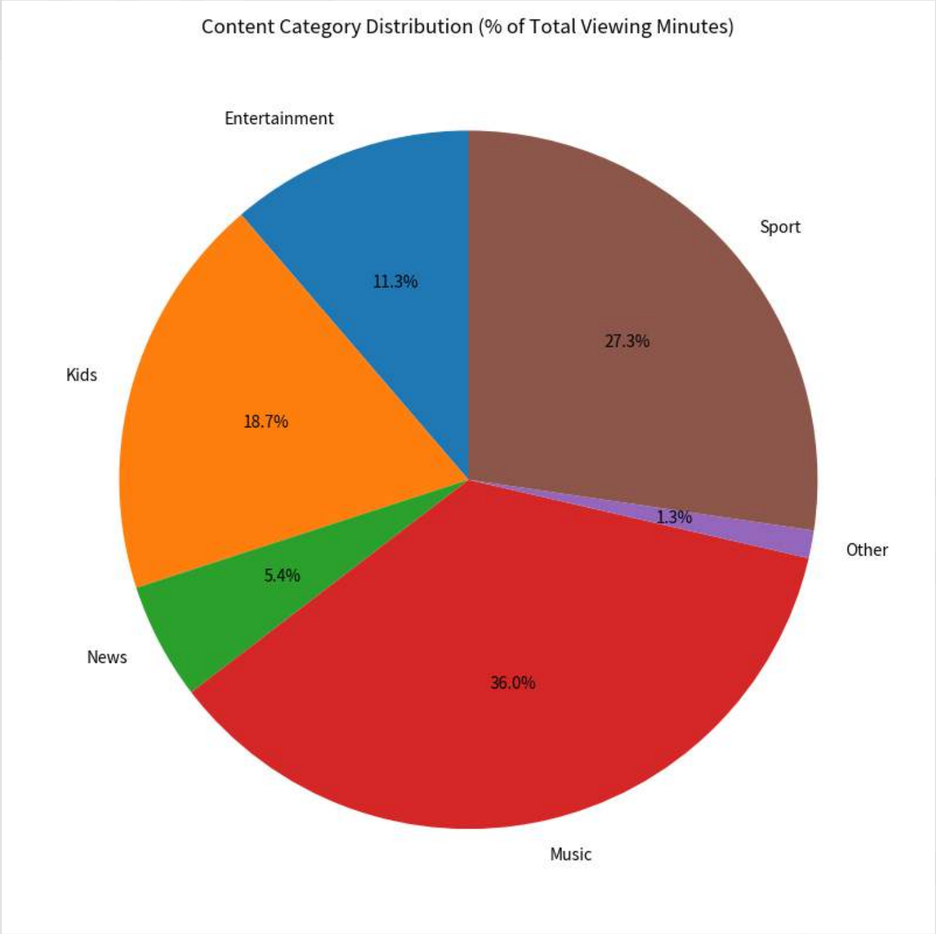
Time Group	Viewing Minutes	% of Total
Afternoon (12:00–16:59)	2,603	31%
Evening (17:00–21:59)	2,176	26%
Night (22:00–05:59)	2,054	25%
Morning (06:00–11:59)	1,499	18%



Insight: Afternoons drive the highest consumption; mornings are weakest.

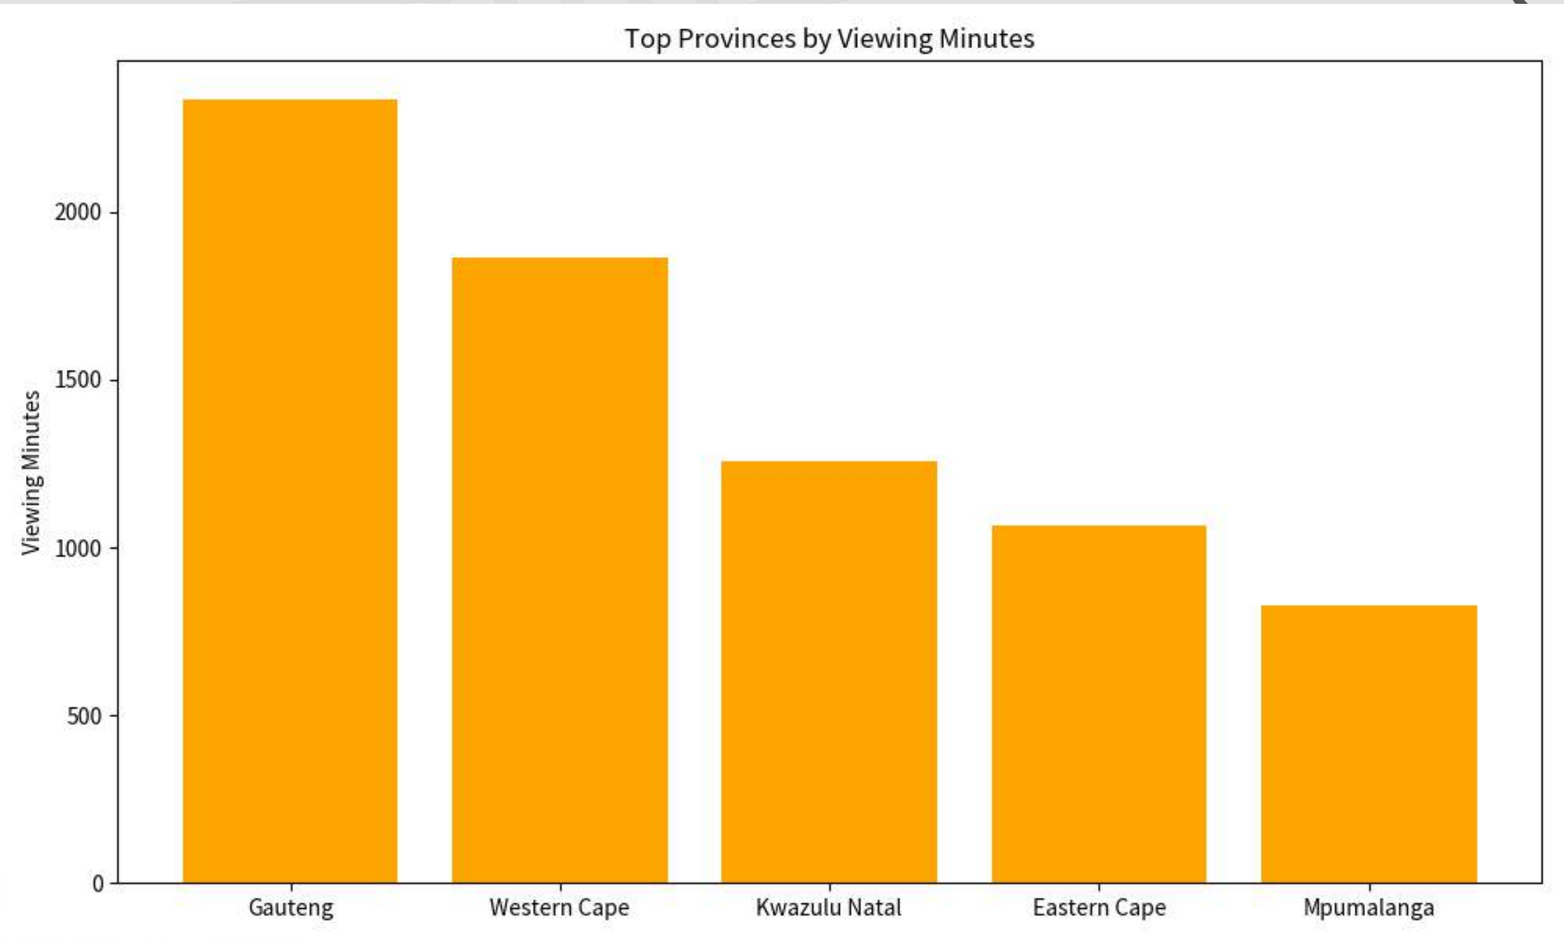
Usage Trends – Content & Demographics

Content Category Distribution (Total Viewing Minutes)



- Music: 2,998 min (36%) – dominant
- Sport: 2,276 min (27%)
- Kids: 1,560 min (19%)
- Entertainment: 940 min (11%)
- News: 450 min (5%)
- Other: 107 min (1%)

Usage Trends – Content & Demographics



Demographic highlights:

- Age: Young Adults (20–39) and Middle-Aged Adults (40–59) dominate
- Gender: Males show consistently higher viewing across categories
- Province: Top markets – Gauteng (2,334 min), Western Cape (1,862 min)

Summary & Expected Impact

Why Film Continues to Matter

- Key Trends: Music/Sport dominate; Saturday afternoons are peak; Sunday/Friday are under-utilised
- Biggest Levers: Content scheduling + demographic targeting
- Quick Wins: Sunday Kids/Music push + Friday Sport blocks
- Growth Path: Move from reactive to proactive, data-led CVM

Factors Influencing Consumption

Primary drivers identified from pivots:

- Time & Day – Afternoons + Saturday peak; Sunday/Friday troughs
- Content Type – Music and Sport account for 63% of all viewing minutes
- Demographics – Young adult males in urban provinces (Gauteng/Western Cape) are heaviest users
- Session Patterns – Mix of short views (<1 min) and engaged/long sessions; popular content sustains longer sessions
- No strong gender/race split in low days, but age/province patterns are clear
- Conclusion: Consumption is highly content-driven and time-sensitive, with demographic skew toward young urban males.

Low-Consumption Days Analysis (Sunday & Friday)

- Sunday (772 min): Lowest overall; Kids (261 min) and Music (304 min) already perform relatively well, but Sport is very low (18 min)
- Friday (952 min): Sport (297 min) and Music (249 min) are stronger, yet total volume lags
- Opportunity: These two days represent clear uplift potential (combined <20% of total viewing)

Content Recommendations for Low-Consumption Days

- Targeted content to boost Sunday & Friday (leveraging overall top performers + day-specific strengths):

Day	Recommended Content	Rationale	Expected Impact
Sunday	Kids + Music bundles; light Entertainment	Kids already strong; family viewing day	Attract families & young adults
Friday	Sport + Music; Evening live events	Sport performs well; post-work unwind	Capitalise on existing Sport interest

- Implementation ideas:
- Schedule high-engagement Music/Sport blocks in Afternoon/Evening slots
- Push personalised notifications: “Sunday Kids Marathon” or “Friday Sport Highlights”
- Cross-promote top channels (e.g., Channel O, SuperSport, Cartoon Network)

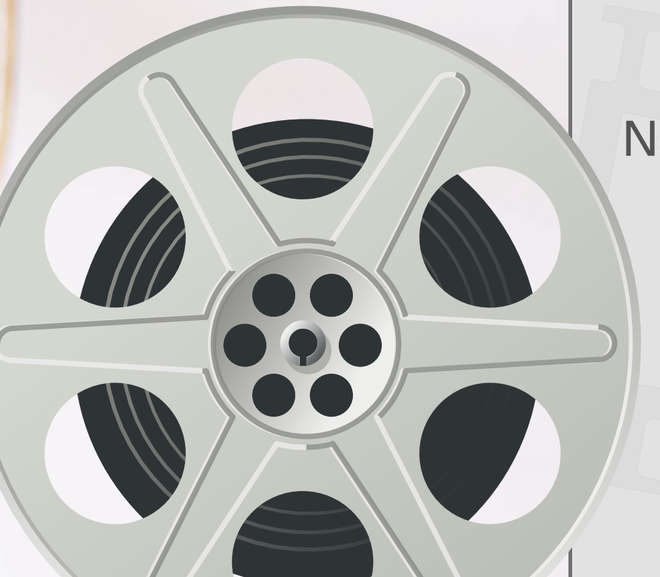
Initiatives to Grow User Base

Retention & Engagement (CVM)

- Loyalty tiers: Reward users who watch > average minutes (e.g., free premium channels)
- Time-based promos: “Sunday Family Pass” or “Friday Night Sport Boost”
- Re-engage low-activity users with tailored content suggestions

Data-Driven Enhancements

- Segment users by age/gender/province for hyper-personalised offers
- A/B test new content slots on low days
- Explore bundling with popular external content (if partnerships possible)



Summary & Expected Impact

Total Viewing Minutes by Time Group

|

- Key Trends: Music/Sport dominate; Saturday afternoons are peak; Sunday/Friday are under-utilised
- Biggest Levers: Content scheduling + demographic targeting
- Quick Wins: Sunday Kids/Music push + Friday Sport blocks
- Growth Path: Move from reactive to proactive, data-led CVM

Next Steps:

- Implement content recommendations immediately (next 2–4 weeks)
- Run pilot campaigns on low days
- Track subscription conversion from increased viewing

Thank you so much
